

I am an XM Radio customer and I benefit from listening to XM Satellite Radio and its traffic and weather channels. This assists greatly in my travels from city to city providing me with instantaneous weather and traffic reports so that I can plan my trips appropriately. This information is not available anywhere else via any other medium that is as accessible as XM. Satellite radio provides every genre of music, news and information and this is also not available anywhere else. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what you are permitted to hear through a service paid for by me. Only I should make this determination. I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I have paid for, I demand and I deserve.

Respectfully,  
William Glatch
